

10 WORK AT HEIGHT

Total commitment to the Golden Rules

Design and Production: www.because.fr - Photo credit: L. Zylberman © TOTAL - March 2017

YOU MUST NOT:

- Work under or near power lines without respecting the minimum safe clearance distance.
- Work on building or tank roofs without first checking their integrity and ensuring that the appropriate protective devices have been installed.
- Move a deployed mobile elevated work platform (MEWP), unless you are specifically authorized to do so.

YOU MUST:

- Put away tools when working at height (above 2 meters).
- Use a safety harness that is safely anchored, outside fixed barriers or in an MEWP.
- Use scaffolding that is fit for purpose and has been inspected.
