--- using a mobile pump

Industrial cleaning

June 2022

Location _____ Date _____

Company observed _____ Permit No. _____

YES NO N/A

POINTS TO BE CHECKED

- 1** Has the "Safety green light" been carried out?
- 2** Has the checklist before start-up been completed by the operations team?
- 3** Do the operator and machine operator have a training/competency certificate for their function?
- 4** Is the working area positioned according to the wind direction and are the truck and the vents located outside buildings?
- 5** Are the team members aware of the product to be pumped (flammable, toxic, etc.) and has the compatibility with the equipments been checked?
- 6** Where it is not possible to collect the vapors, are they vented to a safe area (at least 15 m - 50ft from the truck and downwind; if not and only for gases less dense than air, at least 5 m - 17 ft above the truck)?
- 7** Is the area around the truck, the pumping location and the vents barricaded and the vent location clearly flagged up? (in service stations: barricades around the worksite perimeter)
- 8** Are grounding and equipotential bonding in place?
- 9** Is the atmosphere at the pumping site, at the truck and at the vent location constantly monitored?
- 10** Is the machine operator positioned within reach of the pump emergency stop?

Compliance rate (Nb YES/applicable points): _____ / _____ (_____ %)
